EDUCATION

Monash University June 2024 - Present
Malaysia

- Bachelor of Software Engineering
- Expected graduation: May 2028
- Current CGPA: 3.51/4.00

Sunway June 2023 - June 2024
University

- Monash University Foundation Year (MUFY)
- CGPA: 4.00/4.00

SKILLS

AI tools

- Experiment with the latest tools and techniques
- Use methods to minimize additional issues caused by using AI
- Up-to-date knowledge on the latest AI news

Linux

- Use Linux on a daily basis
- Self-hosted Linux servers
- Experiment and use OS automation tools

Scripting/Automation

- Always eager to use automation to improve working on tedious tasks
- Created tools for a development team
- Personal tools

CI/CD techniques

- Vercel deployments
- GitHub/GitLab Actions for advanced automation

Languages & tools: TypeScript, JavaScript, React, React Native, Rust, Tauri, Python, FastAPI, PostgreSQL, Express, Convex, Vite, Shadcn, Git, GitHub Actions, GitLab CI, Vercel, Linux, Bash
Familiar with: Java, C, Docker

HOMELAB

Proxmox host running self-managed services

- Immich for photo and video storage
- Navidrome for music streaming

SPOKEN LANGUAGES

Native English. Conversational Malay and Chinese.

Software Engineering undergraduate at Monash University Malaysia, graduating May 2028. Works across the stack, from Rust and Tauri on the desktop to React and Postgres on the web. Has led university teams as a scrum master and a software architect. Managed merge request reviews, repository hygiene, and unblocking teammates. Advanced linux knowledge, self-hosts a Proxmox server, and builds small tools to reduce repetitive work. Seeking a software engineering internship.

EXPERIENCE

Worked in a university group (of 6 people) over 3 months

- Used agile and scrum group management techniques
- Built a Learning Management System website
- **Software Stack:** Vite+React with a traditional PostgreSQL+Express backend
- Took on the scrum master role and made sure everyone was on task and helped them if needed
- Took on the fullstack developer role

Worked in a larger scale university group (of 10 people) over 9 months

- Used SAFe group management techniques
- Built a peer tutoring marketplace
- **Software Stack:** Vite+React+Shadcn with a Convex unified backend-as-a-service
- Took on the Software Architecture role that made major decisions on the tech stack
- Took on the backend developer role and moved on to a fullstack role
- Managed the merge requests and general maintainability of the Git repo
- Reviewed the code of each merge request opened

PERSONAL PROJECTS

Voloph

- A desktop app for reviewing homemade badminton clips designed to work from most angles
- Provides a frictionless interface to find and scrub segments of recordings
- Notation tools to mark and review sections
- Built using a Tauri+Rust+React stack

Walltare

- A desktop app for rating/managing a large collection of wallpapers in a folder
- Rate wallpapers using A/B rating techniques that calculate a score
- Users make a decision based on the score
- Initially a React+Vite frontend with a Python FastAPI backend
- Moved to a Tauri+Rust+React stack

Aldex (live)

- A WebApp for tracking and managing music albums
- Offers multiple categories to filter albums
- Provides an elegant UI
- Uses an external API to fetch data about albums from an inputted album detail
- Built using a React+Vite+Convex stack
